

When you open your eyes in the morning, can you read the numbers on your digital clock? Without your glasses, could you recognize the faces of a friend waving from across the street? Now imagine seeing the world in high-definition...all the time. No matter what you've been told in the past, LASIK could be the solution for you today!

Close your eyes for a moment...then open them and look around. Is the world blurry or clear? Treasure your sight and trust your eyes to a doctor who will treat them with the same care he would his own. At the Sugar Land Eye and Laser Center,

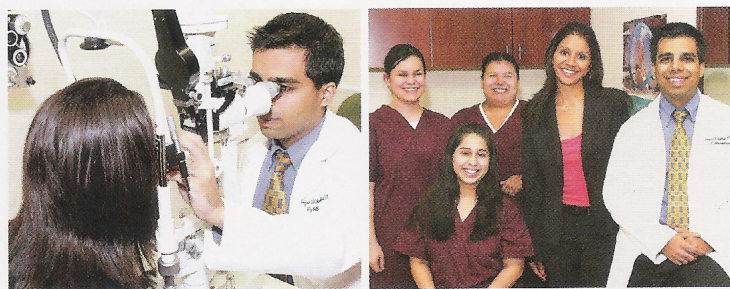

"offered" these options. That's because at some places, you might pay more for custom LASIK, and more again for iris registration, but Dr. Khokhar doesn't believe you should settle for less than the best when it comes to your eyes...so he gives you one easy solution. He says, "I won't use sub-optimal technology on my patients. We offer one price for LASIK, and it includes the VISX laser, the best laser available, as well as customization, and any variations in prescription like astigmatism. You won't have to worry about additional costs for upgrades...you'll get the best and only the best for one up-front price."

Wondering what your LASIK experience would be like? One patient says, "Dr. Khokhar really took his time with me, answering all my questions. His staff scheduled my LASIK at the most convenient time for me, and before my surgery I drifted off in the tranquility room, so I was completely relaxed. During my surgery Dr. Khokhar made sure I understood what was happening every step of the way... and it didn't hurt at all! I went home and went to sleep, and when I woke up the next morning...and everything looked amazingly clear. I even drove myself to my follow-up appointment!"

Not many things in life offer an overnight life-altering change like LASIK. One call to the Sugar Land Eye & Laser Center could open your eyes to a whole new world...a world you've been miss-

A Whole New World

Dr. Amjad Khokhar and his staff welcome each and every patient with warmth, personal attention, and excellent medical care. If you come in for LASIK, Dr. Khokhar himself will do your initial consultation, all your pre-op exams and measurements, your surgery, and all your follow-up exams as well. No wonder his staff will know your name!

We all have eyes as unique as we are...but not all LASIK solutions are created equal. Standard LASIK provides a "one size fits all" correction, so that everyone with the same prescription gets the exact same LASIK solution. That's just not good enough for Dr. Khokhar. He says, "We use custom LASIK to take what amounts to a fingerprint of your eye, so you get a precise correction customized for you. We also use the latest and most accurate technology available for LASIK, which is iris registration. If a patient's eye shifts before treatment, the laser will shift as well for precise alignment." Sound amazing? Well, that's what you get when you visit Dr. Khokhar.

Now you may have noticed that Dr. Khokhar didn't say he

ing. As Dr. Khokhar says, "I got into ophthalmology because I loved the immediate difference I could make in people's lives."
